

## Teamwork Thursday Meteor Shower

**Goal:** To get the astronaut through the meteor shower with out stepping on a meteor!

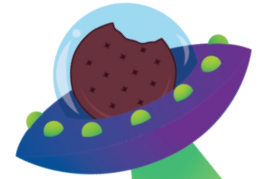

**What you'll need:**

- 5-10 objects (your meteors) *These objects should be tennis ball size and larger.*
- Blindfold of some sort (Bandana, scarf, hand towel, T-Shirt etc.)
- 2+ People

Find an open space of flooring or yard to use.

Spread out your meteors on the floor (you can choose how far apart).

The set up should have a general place to start and an ending place.

One person is the astronaut who is blindfolded, and the other person is the command center.

The command center must guide the astronaut through the meteor shower with their words of direction. The astronaut cannot talk, just listens and follows what the command center is saying. Switch people and have everyone try being the astronaut and command center.
